

**SCPD 56/26 DIN is a double pump with two separate flows of different sizes.**

SCPD 56/26 DIN gives 56.0 and 26.0 cm<sup>3</sup>/rev. and supports a maximum working pressure of 400 bar. It can effectively be directly mounted on gear boxes equipped with engageable and disengageable power take-offs. It is speed optimised and therefore supplied for either left (L) or right (R) rotation direction.

**Other advantages:**

- High self-priming speed
- Constant low noise level
- Long life due to high demands on material selection, such as bearings, seals, etc.
- O-rings on all contact surfaces as well as double shaft seals

**WARNING**

When the pump is running:

1. Do not touch the pressure hose
2. Watch out for rotating parts
3. The pump and hoses may be hot
